SECTION 4: First aid measures

4.1 Description of first aid measures

After inhalation:

Supply fresh air.

Take affected persons into fresh air and keep quiet.

After skin contact: Change contaminated clothing.

After eye contact:

If eye irritation persists: Get medical advice/attention.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

After swallowing:

Do not induce vomiting

possibly consult poison center or a physician.

In case of babies/infants always consult a poison center or a physician.

If symptoms persist consult doctor.

4.2 Most important symptoms and effects, both acute and delayed

No further relevant information available.

4.3 Indication of any immediate medical attention and special treatment needed

No further relevant information available.

SECTION 5: Firefighting measures

5.1 Extinguishing media

Suitable extinguishing agents:

CO₂, powder or water spray. Fight larger fires with water spray or alcohol resistant foam.

5.2 Special hazards arising from the substance or mixture

No further relevant information available.

5.3 Advice for firefighters

The product is not flammable.

Protective equipment:

No special measures required.

Additional information

The hazards caused by the preparation related to the bulk. In the dosage form the deal and the dosage should be noted, according to leaflet.

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Particular danger of slipping on leaked/spilled product.

Wear protective equipment. Keep unprotected persons away.

The danger zones must be cordoned off and marked with appropriate warning and safety signs.

Vacating danger area.

Adhering to specifications of the emergency plan.

Well-informed contact.

Wear breathing apparatus if exposed to vapours/dust/aerosols.

6.2 Environmental precautions:

Do not allow to penetrate the ground/soil.

Avoid release to the environment

6.3 Methods and material for containment and cleaning up:

Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust).

Dispose contaminated material as waste according to section 13.

Ensure adequate ventilation.

6.4 Reference to other sections

See Section 7 for information on safe handling.

See Section 8 for information on personal protection equipment.

See Section 13 for disposal information.

The hazards caused by the preparation related to the bulk. In the dosage form the deal and the dosage should be noted, according to leaflet.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Avoid:

eye contact

Store out of reach of babies and small children

Ensure good ventilation/exhaustion at the workplace.

Prevent formation of aerosols.

Ensure good interior ventilation, especially at floor level. (Fumes are heavier than air).

Wear eye/face protection.

Take off contaminated clothing.

When using do not eat, drink, smoke, sniff

Wash hands before breaks and after work.

It's essential to apply the instructions of the manufacturer.

Information about fire - and explosion protection:

Flammable gas-air mixtures may form in empty receptacles.

The critical range starts ≤ 15 Kelvin below the flash point.

7.2 Conditions for safe storage, including any incompatibilities

Storage:

Requirements to be met by storerooms and receptacles:

The basic requirements for the storage of hazardous materials are observed.

Information about storage in one common storage facility: Not required.

Further information about storage conditions:

The hazards caused by the preparation related to the bulk. In the dosage form the deal and the dosage should be noted, according to leaflet.

Store in a well-ventilated place. Keep container tightly closed.

Storage class: 12

7.3 Specific end use(s) No further relevant information available.

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

Ingredients with limit values that require monitoring at the workplace:

The product does not contain any relevant quantities of materials with critical values that have to be monitored at the workplace.

Additional information: The lists valid during the making were used as basis.

8.2 Exposure controls

Limiting exposure must be done in the following gradation: substitution > technical / organizational measures > personal protective equipment.

Appropriate engineering controls No further data; see section 7.

Individual protection measures, such as personal protective equipment

General protective and hygienic measures:

Use skin protection cream for skin protection.

Do not eat, drink, smoke or sniff while working.

The usual precautionary measures are to be adhered to when handling chemicals.

Keep away from foodstuffs, beverages and feed.

Immediately remove all soiled and contaminated clothing

Wash hands before breaks and at the end of work.

Avoid contact with the eyes and skin.

Respiratory protection:

In case of brief exposure or low pollution use respiratory filter device. In case of intensive or longer exposure use self-contained respiratory protective device.

Hand protection

The glove material has to be impermeable and resistant to the product/ the substance/ the mixture. Due to missing tests no recommendation to the glove material can be given for the product/ the mixture/ the chemical mixture.

Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation

Material of gloves

The protective gloves to be used must represent the specifications of following prescriptions:

- EC guideline 89/686/ EEC
- norm EN374

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a mixture of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

Penetration time of glove material

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

Eye/face protection Tightly sealed goggles

Body protection:

Body protective substances are and-mix job specifically to select in her execution into dependence of hazardous materials concentrations. The chemical resistance of the protective substances should be clarified with the supplier.

SECTION 11: Toxicological information

11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

Acute toxicity Based on available data, the classification criteria are not met.

LD/LC50 values relevant for classification:

The classification was carried out for tested properties according to legal classifications Anh VI Tables 3.1 and 3.2 of the CLP Regulation ("EC-List"), otherwise according to the regulation (EC) No. 1272/2008.

Primary irritant effect:

Skin corrosion/irritation Based on available data, the classification criteria are not met.

Serious eye damage/irritation Causes serious eye irritation.

Respiratory or skin sensitisation

May cause an allergic skin reaction.

Contains (R)-p-mentha-1,8-diene. May produce an allergic reaction.

Based on available data, the classification criteria are not met.

Germ cell mutagenicity Based on available data, the classification criteria are not met.

Carcinogenicity Based on available data, the classification criteria are not met.

Reproductive toxicity Based on available data, the classification criteria are not met.

STOT-single exposure Based on available data, the classification criteria are not met.

STOT-repeated exposure Based on available data, the classification criteria are not met.

Aspiration hazard Based on available data, the classification criteria are not met.

Other information (about experimental toxicology):

The hazards caused by the preparation related to the bulk. In the dosage form the deal and the dosage should be noted, according to leaflet.

When used and handled according to specifications, the product does not have any harmful effects to our experience and the information provided to us.

Additional toxicological information:

The hazards caused by the preparation related to the bulk. In the dosage form the deal and the dosage should be noted, according to leaflet.

Causes serious eye irritation.

11.2 Information on other hazards

Endocrine disrupting properties

None of the ingredients is listed.

SECTION 12: Ecological information

12.1 Toxicity

Aquatic toxicity: No further relevant information available.

12.2 Persistence and degradability No further relevant information available.

12.3 Bioaccumulative potential No further relevant information available.

12.4 Mobility in soil No further relevant information available.

12.6 Endocrine disrupting properties

The product does not contain substances with endocrine disrupting properties.

12.7 Other adverse effects

Additional ecological information:

General notes:

The hazards caused by the preparation related to the bulk. In the dosage form the deal and the dosage should be noted, according to leaflet.

Water hazard class 2 (German Regulation) (Self-assessment): hazardous for water

Do not allow undiluted product or large quantities of it to reach ground water, water course or sewage system.
